

PRODUCTS WITH OX

GENERAL INFORMATION

By handling your new upholstery fabric with care, you can make a decisive contribution to preserving its original beauty. Please note the following recommendations:

- Avoid exposing your new upholstered furniture to direct sunlight.
- If possible, do not place your new upholstered furniture directly next to a radiator.
- Avoid contact between rough clothing and your upholstered furniture.
- Do not use strong cleaning agents, hand sanitizers or acetone. These cause immediate damage and contribute to the deterioration of the material. The use of such cleaning agents is at the owner's risk.

It is not recommended to wash the fabric in the washing machine, as the PVC layer of the fabric is softened during washing and therefore the OX fabric may become brittle or tear.

REGULAR CLEANING

- Vacuum with upholstery nozzle on the lowest setting or using a soft brush. Accumulations of dust and dirt on the fabric can act as an abrasive and cause the fabric to wear prematurely.
- Wipe the surface with a damp cloth to remove light deposits caused by regularly touching the fabric.
- If necessary, add a drop of detergent to the water.

THOROUGH CLEANING

- Wipe with a damp cloth, using lukewarm, distilled water with a little neutral soap.
- Ensure quick drying (never blow-dry or iron)
- A textile lint brush can be used for pilling.

COMMON ERRORS

- Never use a dark cloth on light-colored fabrics, as this may stain them.
- In the case of heavy soiling, do not rub too hard in one place to avoid lightening the fabric.

STAIN REMOVAL

General information

- The quicker you react, the easier it is to remove stains.
- When cleaning upholstered furniture, test the care or household products on an inconspicuous area beforehand and follow the manufacturer's dosage instructions.
- Dabbing is better than rubbing to prevent the fabric from lightening.

What do I need to remove stains?

- Mild soapy water
- Sponge (for light to medium soiling)
- Soft hand brush (for heavy soiling)
- Microfiber or cotton cloth
- Clean water

Cleaning procedure

1. Remove stains with a wet cloth.
2. In addition, dissolve mild soap suds in lukewarm water and apply with a soft cloth/sponge.
3. A soft brush can also be used for stubborn stains.
4. Then wipe the artificial leather with a cloth and clean water and leave to dry.
